
Tunnel Something over SSH using socksproxy

By rac

Published: 02.01.2008 - 13:25

Start SSH Tunnel and open socksproxy

- Open Terminal window and enter

```
$ ssh -CND [port] [user]@[ssh_host]
```

C -> use Gzip compression

N -> set Non interactive mode (just asks for password but doesnt open a shell)

D [port] -> forward port

- Set a socks proxy in the desired application to localhost [port]

Firefox Settings to use socksproxy

Edit -> Preferences -> Advanced -> Network -> Settings...

Check box "Manual proxy configuration"

Set "SOCKS Host" to "localhost" and "Port:" to "[port]"

Browse to URL "about:config"

Filter for "network.proxy.socks_remote_dns" and set to true <-- also query dns over proxy

Tunnel interface Traffic trough Socksproxy

No solution yet.

feel free to complete this information ;-)
